

Caster: Quick Reference (for v0.4.6)

David Conway (CC Attribution 4.0 International)

Important Usage Note: In order to use most of these, you first have to enable the appropriate module by saying “enable <module name>”. Module names are listed at the end.

Numbers (1)

numb <0..1m>	print digits
word number <0..9>	print as words

Alphabet, Punctuation, Spacing (2)

arch brov char delta echo foxy goof hotel India julia kilo Lima Mike Novakeen oscar prime Quebec Romeo Sierra tango uniform victor whiskey x-ray yankee Zulu	letters
clamor at sign hashtag dolly carrot starling prekris* brax* curly* angle* quotes* thin quotes* boom** questo period dot clear*** deli*** shock***	! @ # \$ ^ * () [] { } <> “” ‘ ’ , ? . bkspc del enter
underscore equals modulo slash back slash semper deckle ace*** tabby*** pipe sim apostrophe plus minus sauce*** ^ dunce**** ^ left*** ^ right*** ^	— = % / \ ; : space tab ‘ + - up down left right

* left key is pressed after

** space bar is pressed after

*** repeatable by saying number after

^ available as asynchronous auto-repeating

Comparisons (3)

[is] greater than	>
[is] less than	<
[is] greater [than] [or] equal [to]	>=
[is] less [than] [or] equal [to]	<=
[is] equal to	==

Selection, Editing (4)

shackle shin* ^ queue* ^ fly* ^ stoosh** cut** spark** garb** drop** duple* cancel save	select line shift- <dir> ctrl- shift- <dir> ctrl- <dir> copy cut paste double-click + copy double-click + paste duplicate line escape ctrl-s
--	---

* takes optional number parameter for repetition

^ takes optional direction parameter, one of the direction keys from table (2)

** takes optional number parameter, which is used to determine a persistent clipboard slot

Text Formatting (5)

Capitalization	
yell*	SOME WORDS
tie*	Some Words
gerrish* ^	someWords
sing*	Some words
laws*	some words
Spacing	
gum gun*	somewords
spine*	some-words
snake* ^	some_words

* capitalization and spacing can be combined into a single command; whether combining or not, they must be suffixed by “bow” and then the dictation to format

^ gerrish defaults to gum; snake to laws

Programming Core* (6)

iffae elsay el iffae switch k states breaker default for each for loop do loop while loop convert to integer convert to floating-point convert to string lodge and lodge or lodge not print to console function class add comment long comment value not return value true value false	if else else if switch case break default for-each loop for-i loop do-while loop while loop logical and logical or logical not system out new function new class multi-line null value
---	--

* available for Javascript, Python, Java, C++

Mouse Replacement (7)

kick kick mid psychic shift right-click colic curse douglas rainbow legion left point center point right point	left-click middle-click right-click ctrl-click move cursor by pixels move cursor on grid alternate grid smart text selection mouse to screen left mouse to screen center mouse to screen right
---	--

Template -Based Navigation (8)

jump in*	move cursor inside next ([{<
jump out*	move cursor past next)}]>
jump back*	move cursor inside prev)}]>
fill <target>*	highlight <target> in line

* all of these are asynchronous, and can be canceled with the word “cancel” if the search is taking too long; <target> only uses certain words, some of which are generated by, for example, the loops from table (6)

Window Management (9)

minimize	minimize window
maximize	maximize window
remax	force maximize
dredge*	alt + tab

* slated for expansion

Repetition (10)

again do	repeat last dictation
again <n> times	
record from history	macro recorder

Aliasing (11)

alias <dict>	alias highlighted text
chain alias	alias as CCR

Passwords* (12)

hash password <dict>	hash dictation
get password <dict>	use password seed

* dictation must be three words

Other Miscellaneous Functionality (13)

tau sink	end + enter
tau dock	end + semicolon + enter
kraken	ctrl + space
pita <text>*	fuzzy string matching

Module Names per Table*

Numbers (1)	numbers
Alphabet, Punctuation, Spacing (2)	alphabet, punctuation, navigation
Comparisons (3)	punctuation
Selection, Editing (4)	navigation
Text Formatting (5)	navigation
Programming Core (6)	python, javascript, c++, java
Mouse Replacement (7)	navigation
Template -Based Navigation (8)	navigation
Window Management (9)	
Repetition (10)	
Aliasing (11)	
Passwords* (12)	
Other Miscellaneous Functionality (13)	navigation

* As of version 0.4.6.1, alphabet, punctuation, navigation, and numbers are enabled by default.
